
Can rotavirus vaccine be given at the same time as other childhood vaccines?

- Rotavirus vaccine can be administered with any of the following routine childhood vaccines without interfering with their effectiveness:
 - Diphtheria–tetanus–pertussis vaccine (DTP)
 - *Haemophilus influenzae* type b vaccine (Hib)
 - Inactivated polio vaccine (IPV)
 - Hepatitis B vaccine
 - Pneumococcal vaccine
 - Oral polio vaccine (OPV)
- Give oral vaccines like OPV and rotavirus vaccine **first**, then give other injectable childhood vaccines
